Problem statement

There are multiple news-sharing apps used by a single user and are often spammed with notifications. There is also a lot of fake news which gets shared. A news-sharing app wants to help users find relevant and important news easily every day and also understand explicitly that the news is not fake but from proper sources.

In a web application project, source code is compiled into an assembly (a . dll file), and that is what has to be on the web server.

Each app organizes its content differently, but I wanted to see some sort of category-based organization, whether that was tabs, side panels, grouped content, or anything else.

Customization. Everyone reads the news differently, so there needed to be features available for personalization

Search and filter. Sometimes you're looking for a specific news topic, so I made sure search and filter capabilities allowed you to do that

News apps don't serve the story for its own sake – they serve the user.

Building high-end news apps can be time-consuming and expensive

A news application is a big interactive database that tells a news story. Think of it like you would any other piece of journalism.

Developers in the newsroom are like water in the desert: highly sought after and in short supply.

News application development has come a long way in a very short time.

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

Importance
If each of these tasks could get done without any difficulty or cost, which would have the most positive impact?

Feasibility
Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

At this digital age, people are captivated by smartphones or other mobile devices. They want all necessitous info to be found at their fingertips.
